

**CENTER FOR
TEACHER
INNOVATION**
transforming the journey

"As a result of the Induction Program, I have grown in all areas of my teaching. I have learned strategies to engage students, how to use resources and tools to adapt teaching to diverse learners, how to individualize instruction, classroom management, and how to integrate Common Core standards."

Teacher Services

Supporting the Development of California's Teachers

The Center for Teacher Innovation (CTI) offers both new and experienced teachers exceptional opportunities to advance their careers and grow professionally. We combine a suite of programs with one-to-one coaching from an experienced teaching mentor. Our affordable and innovative approach to formative assessment gives teachers the tools, resources, strategies and support they need for success.

Flexible Induction Programs

CTI offers two Commission-accredited induction programs as a route to a clear credential. Our General Education Induction Program is for teachers with preliminary multiple subjects or single subject credentials and the Education Specialist Induction Program is for special education teachers. Each can be completed via an online or blended path. Both paths include individualized support from a carefully selected, highly trained reflective coach.

High-Quality Professional Learning

Our learning opportunities improve teaching skills, with a focus on cultivating the educational environments students need.

Supportive Intern Teacher Programs

Intern teachers are supported by an on-site coach and a university supervisor. Intern teachers may participate in a single subject or multiple subjects internship.

Affordable, Accessible Teacher Test Prep

Our Accelerated Subject-Matter Acquisition Program (ASAP) offers a comprehensive review for the CBEST, CSET, and RICA exams.

Targeted Subject-Matter Competency Services

Verification Process for Special Settings (VPSS) allows teachers in special programs to acquire subject-matter competency in four core academic subjects: mathematics, science, social science, and English.

Individualized Plans to Obtain Clear Credentials

Credential advisement services are part of the candidate's enrollment and ongoing participation.

Industry-Leading Resources and Tools

We have gathered best-practice resources and tools to assist candidates and coaches in the areas of Common Core State Standards, student engagement, classroom management, and much more.

Let's work together.
